

## A simple game with shapes for the younger ones

### What you need:

- 2 cards (from applebox – the card the apples are placed in a applebox – see pictures below) If you don't have that you can use a carton paper. This game was made for 2 children but you can do more cards if needed
- Paint (I used the paint the children paint with in my preschool)
- Shapes in different colors (I used ring, rectangle, square and triangle)  
The shapes I made in the computer were 3x3 cm. but the rectangle was 2x4 cm
- Laminator machine and plastic
- Scissors
- Basket for the shapes

### What you do:

- Paint the shapes in the „appleholes“ I did each shape in 5 different colors
- Make the shapes in the computer in the same colors as you painted and print them out.
- Cut the shapes, put them in plastic and run them through the laminator machine. Cut them again

### The game:

This is a very simple game that 2 and 3 year olds like a lot. The kids pair the loose shapes with the shapes painted on the applecarton by putting the same shape and color in the holes
