

Find things around you that begin with the letter.....

What you need:

- All the letters in your language (I had the frame 3,5x5 cm and used Skriftis Grunn by using Word Art 300 pt.) You find the what type of letters suit your kids best
- A4 carton paper in light color as thick as the laminator machine can take
- Laminator machine and plastic for it
- Scissors
- Basket for the letters

What you do:

- Make each letter in the computer (or write them) print them out, cut and put into the plastic and through the laminator machine. Cut the frames.

The game:

- Each kid drags one letter and shall find something around the that starts with the letter. The card with the letter is f.e. put on the floor and what the kids find put below the letter.
- This can be done with one kid one letter or the kids can work in groups.
- When the kids have had enough it's time to take a look at what they found, talk about the letters and the words and even write the words on a big paper.
