

Letters and words

A boardgame for 2-4 players (see picture below)

What you need:

- A side from a cardboard box or some other thick carton that you can use
- Colored carton in the size A2
- Glue
- Scissors
- A lot of letter in your language alphabet with frame around it f.e. Century Gothic in the size 75 pt. at least and bold
- Start and Finish frames
- Pictures with word written below
- Book covering plastic
- Laminator machine and plastic
- Basket

What to do:

- Cut the thick carton to size A2 and glue the colored carton on it. Klip siden av papkassen til samme størrelse og kartonet A2. Lim kartonet på papkassen. In the bottom left you glue the Start frame and in the top right you glue the End frame. Glue letters in rows from Start to Finish. Remember to have more of common letters used in your language and to put words together. Cover the board then with the book covering plastic. Use the laminator machine for the rest of the letters. Find pictures with easy words (2-5 letters) print them out and put them in plastic and through the laminator machine. Cut again.

The game:

- 2-4 players. Throw the dice and move forward on the board towards Finish. When you stop you collect the same letter (if you land on A you take one A and keep it with you) All the way to the Finish line you collect the letters and when all have crossed the Finish line they try to make words from their collected letters. The pictures with the word written below can be used for help making words from the collected letters.

Another way to use this:

- Just let the kids play with the letters and pictures and make the words they see on the pictures or make words of their own. .

Note:

- When I made this boardgame I had all the letters in the same box. It took too much time for the kids to look for the letter they needed and they lost interest soon. Now I have the letters in a box (used for screws) and each letter has its place in the box (3-4 letters in each „hole“)and it's easy to find what is needed.
