

## **What words start with the letter .....?**

**(pictures on the next page)**

### **What you need:**

- All the letters in your alphabet. I used the frame 3,5x5 cm. and used a font called Skriftis Grun but Century Gothic or other font that has letters like the children learn can also be used. Make sure that the letters almost fill out the frame. I used Word Art to get the letters like I wanted.
- A4 carton paper in a light color as thick as the printer and the laminator machine can handle
- Laminator machine and plastic
- Scissors
- Glue
- White A2 carton and the same size of thicker carton (You can also use a tablet for whiteboard markers or just big paper and write on it.
- Book covering plastic
- Whiteboard markers
- Basket for the letters

### **What to do:**

- Make the letters in the computer, print them, cut and in plastic and then through the laminator machine. Cut again.
- If you want to make your own board to write the words on you glue the A2 carton on the thicker paper and cover it with book covering plastic. Make holes in both ends on the top and put a string in them so you can hang this on the wall.

### **The game:**

- The children take their turns in taking one letter at a time and then they find all the words they can think of that starts with this letter.
- The teacher writes the words on the tablet and the game goes on until the tablet is full.
- In the end you read all the words and let the children see them

### **Note:**

- I did this with a very big group of 4 and 5 years old and they liked it a lot but I think a smaller group is better f.e. 10 children at the most. Some of the kids stood for a long time looking at all the words and were trying to read them.
